

he went from 200 pounds to 120 pounds. After 7 years of confinement, on February 12, 1973, 39 years ago this week, Colonel SAM JOHNSON was finally released.

After his release, Colonel JOHNSON continued to serve in the United States Air Force for a total of 29 years. While he was in that POW camp, back home in Texas, his wife, Shirley, knew he'd been shot down, but she didn't know what had happened to him for 2 years—whether he was alive, dead, or missing in action.

After he left the United States Air Force, he served in the State house in Texas. He had his own business, and then in 1991, he came to the House of Representatives, where he continues to serve with distinction and to represent the folks from Texas.

SAM JOHNSON returned to America with honor. He is a special breed. He is the American breed. He is that special warrior, even during the time he was a captive warrior, who never forsook his duty and never forsook his honor.

Colonel SAM and other Vietnam veterans were not only treated badly in Vietnam, but many who returned were treated poorly by America. These vets had no welcome home parades. They were cursed and they were spit upon. America did not really appreciate those old warhorses from Vietnam.

So, to Colonel SAM and all who served in Vietnam, welcome home, welcome home, welcome home.

Some served and returned. Some served and did not return. Some served with the wounds of war.

So, to Colonel SAM JOHNSON, we appreciate your service because the worst casualty of war is to be forgotten.

And that's just the way it is.

SAFE ROUTES TO SCHOOL

The SPEAKER pro tempore. The Chair recognizes the gentleman from Oregon (Mr. BLUMENAUER) for 5 minutes.

Mr. BLUMENAUER. The fancy new software at use in our congressional offices gives us the ability to see all of the constituent contacts, all of their questions, complaints, and concerns by category.

I wonder if anyone in Congress has received any complaints about the Safe Routes to School program. I'll bet not. So why is the Republican transportation bill eliminating Safe Routes to School, creating an "unsafe route to school"?

This is a wildly popular program, costing a fraction of a percent of the transportation budget, and it has had a huge impact nationally on our children because it deals with real consequences for them.

□ 1020

A generation ago, 40 or 50 percent of children were able to get to school on their own. Now only 13 percent can. It's no wonder that childhood obesity has exploded over the same period of time,

with one in three of our children now overweight or obese or seriously at risk. Asthma has gone up for children 74 percent over the last 5 years. There are real consequences for accidents. There were 23,000 5- to 15-year-olds injured, and more than 250 kids killed walking or biking in 2009.

Getting our children to school in the morning represents 10 to 14 percent of the entire American morning commute, 6.5 billion trips stretching 30 billion miles. Doesn't it make sense to do something about the congestion, the injuries, deaths, and the obesity? Absolutely.

Twenty years ago, as Portland's commissioner of public works, I started a program in my city to help teach kids how to get to school safely and to improve road and sidewalk conditions. Ten years ago, we started a national program, Safe Routes to School. Schools with these programs show a 20 percent to 200 percent increase in the number of kids walking or biking. According to a recent California study, these students are healthier, they do better in school, and there is a 49 percent decrease in accident rates.

So why are my Republican friends advancing a transportation bill attacking Safe Routes to School, stripping it out, making it an unsafe route to school? Well, it's a fitting metaphor for perhaps the worst transportation bill in history. I think that may be one of the reasons they were afraid to even have a single hearing on the package that's coming to the floor this week.

They attacked the foundation of 20 years of balanced transportation reform. It shatters the 30-year partnership between transit and road interests that gave 80 percent to roads and 20 percent to a transit account, brokered by Ronald Reagan's administration. It undercuts the role of local governments and metropolitan areas to shape and control their own destiny, leaving them to the tender mercy of bureaucrats in their State capitals.

But it's not just Safe Routes to School. They attack high-speed rail, bicycles, Amtrak. They attack the basic environmental and public participation protections that have been gutted that actually have been very important to make sure that we have good projects that aren't held up politically or in court.

Sadly, I am very disappointed. I have worked for years on a coalition of broad interests across the spectrum of highway, professional, environmental, labor, business groups toward a good transportation bill and a coalition that can work together for the badly needed transportation resources. This Republican bill splits away valuable allies and will make it almost impossible to get the resources we need in the future. And, of course, their bill is \$5 billion short for highways after taking all of these resources and stuffing them into the Highway Account.

This is, simply, the worst highway bill ever. It is the first we've seen that

has not been at least a semblance of bipartisan and is something that's never been considered in committee. Too timid to do the job, it recklessly abandons the trust fund principle, raising the ire of budget hawks for abandoning "user pay". It guts the most popular programs that help stretch dollars and improve communities. And, as I say, it shatters the coalition that we need to deal with the future resources.

Mercifully, this theological statement, sloppy, incomplete, and ill-considered has no chance of ever being enacted into law; but it's important that the House reject it. There is no more powerful symbol of how bankrupt this proposal is than eliminating the wildly popular and effective Safe Routes to School. If for no other reason, reject this bill for our children.

IMPROVING THE TRANSPORTATION BILL

The SPEAKER pro tempore. The Chair recognizes the gentleman from Illinois (Mr. DOLD) for 5 minutes.

Mr. DOLD. Madam Speaker, one of the core functions of the government is to invest in infrastructure and transportation. This is not a Republican idea or a Democrat idea. It's an American one. At a time when people are so desperately looking for Washington to come together, this is an issue that we should and can work together on.

This week we're debating the transportation bill. While there are many great qualities about this bill, there is still a need—and I would argue a great need—to improve it. That's why I am pleased that there are literally hundreds of amendments to try to strengthen this bill.

I hail from the State of Illinois. Illinois is a donor State, which means that we are putting in more transportation funds than we are receiving back from the Federal Government. That is why I am concerned by the cuts facing our State. We stand to lose almost \$650 million. As one of the largest manufacturing hubs of the country, our region cannot afford to lose this critical funding. Our transportation funds help strengthen our local economy and keep jobs at home.

Let me be clear. There are some very good steps in this bill that I believe we all should be able to embrace. The bill provides long-term certainty to States when they're planning their transportation projects. We haven't had a transportation bill in a number of years, since 2005; and this would provide 5 years of stability. It includes numerous reforms that enable States to cut through red tape and speed up the completion of projects, many taking about 15 years today, which would be going down to 7 or 8 years in the future.

I'm pleased that the bill strengthens the Harbor Maintenance Trust Fund, which impacts places like Waukegan Harbor. Waukegan Harbor is a critical part of the Great Lakes harbor system
